

PoV WEB CAMERA

A WEBCAM WITH A POINT OF VIEW

PoV

PoV is a unique handheld 'point-and-shoot' web camera designed to communicate your point of view. Unlike conventional webcams that focus only on the users' "talking head" image, PoV webcam is a detachable viewing tool where the user controls the point of vision.

Pen-shaped design for use as a pointing device

The handheld option allows you to freely guide the PoV and direct shots you would like to capture or view. Engage your family, friends and contacts with your "Point of View" by aiming at environments, objects, documents and more.

Close-up mode with adjustable macro focus

An oversized focus ring provides smooth and dynamic adjustments. Ideal for capturing close-ups or viewing documents. Focus down to 1.5 inches away from subject matter.

Shoot, snap and share images instantly with included software

With the included PoV software, one click of the "send" button transmits a snapshot to your contacts. Whether for personal or business use, the PoV simplifies sharing images over the Internet.
